

Philasande Ngcamu

Full-Stack Software Developer · AI Automation Engineer

Soweto, Gauteng, South Africa · 083 492 9643 · philangcamu07@gmail.com · LinkedIn · Portfolio

SUMMARY

Full-stack software developer and AI automation engineer with 4+ years of hands-on experience, currently Software Architect & AI Engineer at Land and Sea Shipping (4PL logistics). Build production web and mobile applications across the stack — TypeScript, Node.js, Next.js, React, React Native, Python, PostgreSQL/Supabase, Google Cloud. Ship secure payment integrations (PayFast, PCI-DSS, webhook signature verification), AI agents on n8n with Claude and Gemini, and internal automation tools. Pursuing a BSc in Mathematics and Computer Science at UNISA.

SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Frontend: React, React Native, Next.js, HTML, CSS, UI/UX implementation

Backend: Node.js, REST API design, OAuth2, webhooks, signature verification, concurrency & idempotency

Databases: PostgreSQL, Supabase

Cloud & DevOps: Google Cloud Run, Microsoft Azure, Vercel, Git, CI/CD, Postman

AI & Automation: n8n, LLM integration (Gemini, Claude), prompt engineering, RAG, conversational AI flows, Jira automation (smart values, CRON, branching)

Payments & Compliance: PayFast gateway, IPN/webhook verification, PCI-DSS-aligned flows

Integrations: Shipping-line APIs (Maersk, MSC, CMA CGM, Hapag-Lloyd), Microsoft 365 (SharePoint, Lists, Power Automate), Google Analytics, WhatsApp Business API

EXPERIENCE

Software Architect & AI Engineer — Land and Sea Shipping · Jan 2026 – Present

4PL international logistics & shipping · Roodepoort, Gauteng, ZA

- Lead architecture and delivery of AI automation and full-stack systems supporting logistics operations, integrating shipping-line APIs (Maersk, MSC, CMA CGM, Hapag-Lloyd) with internal tools.
- Build and deploy WhatsApp chatbots and AI agents on n8n with Claude and Gemini for rate enquiries, booking, and tracking flows.
- Design REST APIs and integration services in Node.js and Python with OAuth2, webhook signature verification, and idempotency patterns.

Software Developer — Land and Sea Shipping · Aug 2025 – Jan 2026

- Supported and refined a PayFast payment gateway integration in a production Next.js application, ensuring signature verification and secure redirect flows aligned with PCI-DSS.
- Troubleshoot IPN (Instant Payment Notification) callbacks and improved payment-flow reliability through backend signature validation.
- Integrated Google Analytics across Land and Sea Shipping and Land and Sea Risk sites end-to-end — deployment, tagging, and reporting dashboards for marketing and operations.
- Built Jira automation rules using smart values, CRON triggers, and branching logic to schedule tasks, auto-assign statuses, and route tickets — reducing manual workload by ~30 minutes per week.
- Provided desktop and Yaxxa VoIP support to keep daily IT operations and business communication running.

Junior Software Developer — Land and Sea Shipping · Jun 2024 – Aug 2025

- Developed mobile and web applications across the stack with a focus on UI/UX, translating design mockups into functional React/Next.js components in collaboration with UX and marketing teams.
- Provided technical support for internal systems including domain setup, email delivery, site performance, and Rocketseed email-signature configuration.
- Supported cross-functional teams during critical event launches and marketing pushes.

Full Stack Developer Intern — Umuzi.org · Apr 2023 – Mar 2024

- Collaborated with agile teams to build full-stack web applications; participated in code reviews, project planning, and continuous-learning sprints.

Full Stack Developer Trainee — Umuzi.org · Nov 2021 – Apr 2023

- 18-month intensive full-stack development programme: real-world projects, pair programming, code reviews, agile methodology, soft-skills workshops.

EDUCATION

BSc Mathematics and Computer Science — University of South Africa (UNISA) · Jan 2025 – Dec 2027

National Certificate in IT: Systems Development — Umuzi.org · Nov 2021 – Oct 2022

CERTIFICATIONS

Google Cloud: Infrastructure & Application Modernization · Google Cloud: Exploring Data Transformation · Google: Introduction to Generative AI · Accenture Digital Skills: User Experience · National Certificate in IT: Systems Development (Umuzi)
